Specify the main host institution:
Add

Specify the additional host institution(s) (Optional)
Add

(if one or more other host institutions are involved, please click 'Add' to select an institution in the drop-down menu. The chosen institution will appear in the list below.)
Add per host institution the required staff, consumables and equipment.

You are not allowed to request funding for foreign institutions or institutions belonging to the French-speaking community of Belgium. The amount that is applied for in the first year, has to be equal or higher compared with the funds asked for during the other years.

For each project, and in case of an interdisciplinary project, for each host institution, one can apply for €40,000 to €150,000 each year including research staff and consumables. In case one of the project partners only requests funding for consumables, the lower limit for this partner is set at €20,000.

Additionally, it is possible to request funds for equipment up to €250,000. Matching funding is allowed up to €150,000.

To do so, click one of the tabs below:

- Staff
- Consumables
- Equipment

A research project is executed under the direction of a promoter in cooperation with one or more co-promoters. The promoters and co-promoters need to fulfill the conditions stipulated in article 9 of the rules for research projects.

The co-promoters are the actual initiators of the project, and as such are responsible for it. The co-promoters accept that the applicant will act as supervisor-spokesperson towards FWO. It is not possible to use the available budget to finance the co-promoters’ salaries.

A researcher can only act as a co-promoter for maximum two projects per application round.

A detailed list of all publications of the principal investigator appointed at a Flemish host institution and the other promoters should be submitted through the FWO portal before the final submission date of the call.

NOTE: These publications do not have to be sent as a separate attachment nor as part of another attachment.

Who is the principal investigator, appointed at a Flemish host institution?

Please list 10 potential referees below and provide contact details.

Not eligible as referee are:

- members of the Board of Directors of the FWO;
- members of an FWO project team;
- persons appointed to a Belgian university, research institute or any other organization or, in the case of calls for proposals in the framework of bilateral agreements, persons appointed to similar institutions or organizations in the country where the foreign project partner is professionally active in, in the case of applications for mobility grants, persons appointed to a similar institution or organization in the country the applicant intends to visit;
- persons with a professional appointment to a foreign institute where the applicant(s) had been employed as a student or postdoc after January 1st of the year n-3 in year of application;
- any co-authors with the applicants of a publication that was submitted or published after January 1st of the year n-3 in year of application;

'Co-authorship' is to be understood as follows:

- co-authorship of a monograph of which the applicant is co-author as well;
- co-authorship of an article or another type of contribution to a collection (book, journal issue, report, congress proceedings, ...) of which the applicant is co-author as well.

Editors are not regarded as co-authors inside as they have not also acted as what is understood under 'co-author' as described above. Co-editors of the applicant are not accepted as an external referee.

The applicant(s) is responsible for the eligibility of the proposed referees. Whenever the proposed referees do not comply with the eligibility criteria, the application will be declared ineligible.

In case the applicant(s) doubts the eligibility of one or more of the proposed referees he or she can contact the FWO through his/her e-mail account before submitting the application. The questions concerning eligibility that reached the FWO before the application was submitted will be presented to the FWO referee commission of the appropriate scientific domain consisting of all expert panels’ chairs of that domain. Five referee commissions are established, one for each domain: biological sciences; humanities and social sciences; medical sciences and science & technology; for applications submitted to the interdisciplinary panels the referee commissions of the respective scientific domains will be consulted. In case co-authorship is detected in publications with ten or more authors, the FWO Administration will consult the referee commission as well. In all above cases, the referee commission will decide on the eligibility of the proposed referees. When the referee commission decides negatively on the eligibility of a proposed referee in an application that has already been submitted, this application will be disqualified. When the referee commission answers negatively to a question concerning the eligibility of a proposed referee that reached the FWO before the application was submitted, the applicant will be asked to propose a new referee that does meet the eligibility criteria.

After the administrative check, the FWO will inform the applicant about the violations that were found. In case the alleged violations result from a technical error of the FWO administration, the FWO can be notified.

For the integral regulations on internal and external peer review, see http://www.fwo.be/Panel-reglement.aspx

Indicate the state of the art.

Indicate the state of the art. Use up to 5000 characters.

Describe the objectives of the research.

Describe the envisaged research and the research hypothesis, why it is important to the field, what impact it could have, whether and how it is specifically innovative and challenging. Use up to 5000 characters.

Describe the methodology of your research.

Describe the envisaged methodology for the research, including intermediate goals, indicate how you will handle unforeseen circumstances, intermediate results and risks. Explain how this methodology is according to the scale of the aim and where it is innovative. Use up to 5000 characters.

Provide a work plan, i.e. the different work packages and a detailed timetable.

Describe the different work packages and the proposed research work will be divided in months for each WP, the time that it is expected to take. You might use a table or diagram. They are intended to clarify the work plan. Use up to 5000 characters.

Enumerate the bibliographical references that are relevant for your research proposal.

Enumerate the bibliographical references that are relevant for your research proposal. Use up to 5000 characters.

Indicate below whether you think the results of the proposed research will be suitable to be communicated to a non-expert audience and how you would undertake such communication.

FWO encourages researchers to disseminate the results of their research widely and valuate them where possible. Use up to 5000 characters.

Please provide a list of up to 5 key peer reviewed publications for each promoter and foreign co-promoter that are representative for their scientific career.

Give all bibliographic details of the publications and mention the impact factor of the journal in which they were published. Mention the number of citations and the number of pages/abstract. Use up to 5000 characters.
