APPLICATION FORM FOR A BILATERAL SCIENTIFIC COOPERATION WITH VIETNAM

FILE NUMBER: 4292

Give the English title of your research proposal. Up to 250 characters

Give the Dutch title of your research proposal. Up to 250 characters

Give the Vietnamese title of your research proposal. Up to 250 characters

Give a summary of your research proposal in layman's terms. Up to 500 characters
Application form: Bilateral Scientific Cooperation Vietnam

Add per host institution the required staff, consumables and equipment.

You are not allowed to request funding for foreign institutions or institutions belonging to the French-speaking community of Belgium. The sum of staff + consumables that are applied for in the first year, has to be equal or higher compared with the funds asked for during the other years.

In the frame of the Bilateral Agreement the average project size on the Flemish side should be around €100,000 annually. However funding up to €300,000 is allowed (minimum €45,000). In case one of the project partners only requests funding for consumables, the lower limit for the partner is set at €25,000.

Make sure that the requested funding on Vietnamese side should also be included in the application (in Vietnamese Dong).

In any case the requested budgets must be fully justified in the project proposal.

Additionally, it is possible to request funds for equipment up to €150,000. Matching funding is allowed up to €125,000.

To do so, click one of the tabs below.

You should first add one or more host institutions.
Add a host institution: the required staff, consumables and equipment.

You are not allowed to request funding for foreign institutions or institutions belonging to the French-speaking community of Belgium. The sum of staff + consumables that are applied for in the first year, has to be equal or higher compared with the funds asked for during the other years.

In the frame of the bilateral agreement the average project size on the Flemish side should be around €75,000 annually, whereas funding up to €300,000 is allowed (minimum €10,000). In case one of the project partners only requests funding for consumables, the lower limit for the partner is set at €30,000.

Please be aware that the requested funding on Vietnamese side should also be included in this application (in Vietnamese dong).

In any case the requested projects must be fully justified in the project proposal.

Additionally, it is possible to request funds for equipment up to €250,000. Matching funding is allowed up to €125,000.

To do so, click on one of the tabs below.

Please add some funds:

Provide a short CV of the personnel to be appointed on this project and already involved.

Also include a short CV for both the Flemish and foreign supervisors and all co-supervisors (max. 1 page) with 5 key peer reviewed publications that are representative for their scientific career. You can provide this in full text by taking into account the current position and other appointments relevant for this application. It can also be important to mention previous scientific awards received and other relevant information to evaluate the scientific CV.

Please attach the requested file in PDF (max. 10MB)

Some compulsory fields in this section have not been completed.

Add per host institution the required staff, consumables and equipment.
- You are not allowed to request funding for foreign institutions or institutions belonging to the French-speaking community of Belgium. The sum of staff + consumables that are applied for in the first year, has to be equal or higher compared with the funds asked for during the other years.
- In the frame of the Bilateral Agreement the average project size on the Flemish side should be around €10,000 annually. However, funding up to €130,000 is allowed (minimum €40,000). In case one of the project partners only requests funding for consumables, the lower limit for this partner is set at €20,000.
- Please be aware that the requested funding on Vietnamese side should also be included in this application (in Vietnamese Dong).
- In any case the requested budgets must be fully justified in the project proposal.
- Additionally, it is possible to request funds for equipment up to €130,000. Matching funding is allowed up to €130,000.

A research project is executed under the direction of supervisors in cooperation with one or more co-supervisors. The supervisors and co-supervisors need to comply with the conditions stipulated in article 6 of the rules for research projects.

The co-supervisors are the actual initiators of the project, and as such are responsible for it. The foreign supervisor and co-supervisors accept that the supervisor appointed at a Flemish host institution, will act as supervisor-episkopos towards FWO. It is not possible to use the available budget to finance the co-supervisors’ travel costs.

A detailed list of all publications of the supervisor appointed at a Flemish host institution and all other (co-)supervisors should be submitted through the FWO-EP portal before the final submission date of the call.

NOTE: These publications do not have to be sent as a separate attachment nor as part of another attachment.

Who is the supervisor, appointed at a Flemish host institution?

If you have indicated "Yes" for at least one of the items below, you must submit your proposal to the research ethics committee of your host institution for ethical clearance, as soon as your application has been approved for funding. Your project can only start when this clearance has been formally given:

- I hereby confirm that none of the issues below apply to my proposal.
- I hereby confirm having taken note that an ethical clearance is needed for the start of my project. I will thus ensure submission of my proposal to the research ethics committee of my host institution.
- I hereby confirm having already submitted my application for an ethical clearance at the research ethics committee of my host institution.

Please specify which ethical committee will decide on your application (optional): [Option]

If one or no issues apply:

Informed consent
Does the proposal involve children?

Does the proposal involve infants or minors under 18 years of age?

Does the proposal involve adult healthy volunteers?

Does the proposal involve human genetic material?

Does the proposal involve human biological samples?

Does the proposal involve human data collection?

Research on human embryos / Fertile

Does the proposal involve human embryos?

Does the proposal involve human test-tube embryos?

Does the proposal involve human embryonic stem cells?

Privacy

Does the proposal involve processing of genetic information or personal data (e.g., health, sexual life, ethnicity, political opinions, religious or philosophical convictions)?

Does the proposal involve tracking the location or observation of people?

Research on animals

Does the proposal involve research on animals?

Are those animals transgenic; can laboratory animals?

Are those animals transgenic farm animals?

Are those animals caged farm animals?

Are those animals non-human primates?

Research involving developing countries

Are you going to use local research staff?

Is there benefit to the local community?

Dual use

Does the proposal involve dual use applications?

Does the proposal involve the potential for terrorist abuses?

ICT implants

Does the proposal involve clinical trials of ICT implants?

Please list 10 potential referees below and provide contact details.
The FWO administration will contact referees from this list in a random order. Referees should be appointed as a university, research institute, or research entity of another type of organization and at least at postdoctoral level.

Not eligible as referees are:
- members of the Board of Directors of the FWO;
- member of an FWO granted panel;
- persons appointed to a Belgian university, research institute or any other organization in the case of calls for proposals in the framework of bilateral or lead agency agreements, persons appointed to similar institutions or organizations in the country where the foreign project partner is professionally active;
- persons with a professional appointment to a foreign institute where the applicant has been enrolled as a student or professional after January 1st of the year n-2 (year of application);
- any co-author with the applicants of a publication that was submitted or published after January 1st of the year n-3 (year of application);

Co-authorship is to be understood as follows:
- co-authorship of a monograph of which the applicant is co-author as well;
- co-authorship of an article or another type of contribution in a collective book, journal, issue, report, congress proceedings, abstract... of which the applicant is co-author as well.

Editors are not regarded as co-authors unless they have not also stated what is understood under 'co-author' as described above. Co-edition of the applicant are not accepted as an external referee.

- partners of the applicant in a research cooperation, whether formalized in a research project or not, that has been applied for or has been running after January 1st of the year n-3 (year of application). In this context, the following shall in any case qualify as research cooperation (not exhaustive list):
  - Cooperation under a research fellowship, granted by the FWO;
  - Cooperation under a research project, whether related to a specific subject or not or under an international cooperation project, granted by the FWO;
  - Cooperation under the Onderzoeks programme or the Big Science Programme, granted by the FWO;
  - Cooperation under a Scientific Research Network, granted by the FWO;
  - Cooperation under programmes similar to those mentioned above, granted by organizations other than the FWO;
  - Joint research work not formalized in a cooperation structure as defined above;
  - Research carried out in the relevant areas and/or with research facilities provided by the applicant or the referee or vice versa;
  - ...

EXTRA DATA

IMPORTANT

The project outline should be structured following the template provided by FWO. The sequence of the different topics should be followed exactly as provided in the original template. The total project outline has a maximum of 11 pages (Font Colin 14) which includes all tables, graphs, illustrations, etc. You can upload the project outline as a .PDF file here.

PROJECT OUTLINE

Indicate the state of the art.

Klik hier als u tekst wilt invoeren.

Describe the objectives of the research.
Describe the envisaged research and the research hypothesis, why it is important to the field, what impact it could have, whether and how it is specifically unconventional and challenging.

Klik hier als u tekst wilt invoeren.

Describe the methodology of your research.
Be as detailed as necessary for a clear understanding of what you propose. Describe the different envisaged steps in your research, including intermediate goals. Indicate how you will handle unforeseen circumstances, intermediate results and risks. Show where the proposed methodology is according to the state of the art and where it is novel.

Klik hier als u tekst wilt invoeren.

Provide a work plan, i.e. the different work packages and a detailed timetable.
Describe the different work packages (WP) the proposed research work will be divided in. Indicate for each WP the time that it is expected to take. You might use a table or another type of scheme to clarify the work plan. Clearly indicate the contribution of each project partner, taking into account the complementary expertise of the project partners.

Klik hier als u tekst wilt invoeren.

Enumerate the bibliographical references that are relevant for your research proposal.

Klik hier als u tekst wilt invoeren.

Indicate below whether you think the results of the proposed research will be suitable to be communicated to a non-expert audience and how you would undertake such communication. FWO encourages its fellows to disseminate the results of their research widely, and valorize them where possible.

PROJECT OUTLINE

EXTRA DATA

RESEARCH CONTEXT

Explain how this project fits in the research activities of your research group and the foreign research group.

If the project has already been initiated, please state the progress of your research. Elaborate on the complementary expertise of the project partners and explain how the project parts are integrated and relevant for the scientific input from both sides. What is the added value of this scientific collaboration?

Use up to 3500 characters.

Provide any other relevant national and international context of the project.

Attention research collaborations, larger projects, programs and international networks in which your research can be situated.

Use up to 3500 characters.

Describe the past cooperation between the project partners.

Use up to 3500 characters.
