EXAMPLE OF AN APPLICATION FORM:

JUNIOR POSTDOCTORAL FELLOW
LOGIN TO E-LOKET

Applicants first have to register in order to receive a login name and password, which gives access to the web-based FWO e-portal for preparing and submitting a proposal. Go to the FWO home page (http://www.fwo.be/en/) and click on E-loket.
Login

Welcome back! Login to access the FWO's E-Loket (V2)

Email/username

Password

Did you forget your password?

☐ Remember My Login

LOGIN

or

Login using ORCID
E-LOKET PERSONALIA

Please make sure to update your personal data with each future application, especially the publications section.

Some further hints to complete your personal details:

- **General:**
  - National registration number
  - Also non-Belgian applicants with Belgian ID card
  - ORCID registration [https://orcid.org/](https://orcid.org/)

- **Diplomas & posts/career**
  - Correct, complete & up to date!
  - PhD future date (<1 June 2022): “Stud. PhD” + provisional date
  - keep FWO updated!

- **Disciplines**
  - Use level 4

- **Publications**
  - Complete list as on Dec 1, 2021
  - Published or accepted for publication
  - New: categories A.1.1 & A.1.2 merged to A.1

- **Addresses**
  - (future) ‘Belgian service address’!
  - Legal domicile address
    - Non-Belgian domicile in EU: add TIN code (tax identification number)

Please note, when entering publications (e-portal ‘personal details’), the previous sections A.1.1 and A.1.2 in the publication lists have been merged into a single section: *peer reviewed articles in journals* (i.e. without distinguishing between Web of Science, VABB-SHW and the like). A2 deals with ‘non-peer
reviewed articles in journals’. With the transition from the old to the new system, publications previously entered in A.1.1. and A.1.2. have already been combined in chronological order in the new section A1. However, applicants remain themselves responsible for the accuracy of the information included in the personal details, application forms and the like. Applicants are therefore advised to carefully check their combined publications in A1.

You can start a new fellowship application only if at least following items in ‘Personal Details’ are completed:

**General**
- Gender
- Place of birth
- Nationality
- ORCID iD

**Diplomas**

**Posts / Career**

**Addresses**
- Domicile address (in Belgium or abroad)
- (Future) service address
After completing or editing your personal profile, you may start or proceed preparing your application. On your dashboard select ‘New application’ to start a new application or ‘my applications’ to complete an unfinished application.
APPLICATION TYPE SELECTOR

Select an application category and type:

**Application type selection**

- **Fellowships**

- **Postdoctoral Fellow**

**Eligibility window**

- Postdoctoral fellowship junior: PhD obtained between Oct. 1, 2019 and June 1, 2022.
- Postdoctoral fellowship senior: PhD obtained between Oct. 1, 2016 and Sept. 30, 2019 AND min. 2 years postdoctoral research experience on Oct. 1, 2022.

Eligibility window extensions may apply. Postdoc programme regulations, Art. 6.

**Working title (optional)**

Define a working title for your application so you can easily identify it later. This title is not a part of the application itself and can be changed later on.

Create application
APPLICATION FORM

Manual save as well as auto-save features
If granted, this fellowship will start on the following date.
Default start date is October 1. Alternatively, November 1 is also possible. Please consider your choice carefully, as it is binding once your application has been submitted.

1 october  1 november

Enter the English title of your research proposal.

Enter the Dutch title of your research proposal.

Complete the abstract of your research proposal - English version.

Complete the abstract of your research proposal - Dutch version.

Enter the English title of your PhD dissertation.
Specify promoter, research group and host institution.
Enter the Dutch title of your PhD dissertation.

Select up to five scientific disciplines that best characterize the proposed research.

Update scientific disciplines at the 'personal details' section of your e-portal.
Go to personalia to update your disciplines ➔

1. Preschool education and kindergarten
2. Physiology
3. Neurology and neurosciences
4. Architecture management
5. Neurobiology
6. Behavioural biology

Enter up to three free-text keywords or concepts that best characterize the proposed research.

These keywords allow reviewers to quickly understand the broad scope of your proposal.

Minimum amount of entries: 1.
Maximum amount of entries: 3.

Please add an item
Personal data

Explain any career breaks.

Make sure your current position and previous appointments are well listed in the e-portal ‘Personal details’ section (“Posts / Career”). Explain possible ‘gaps’ in your CV in the input fields below. If you have interrupted your academic career at any given point for at least three months (maternity leave, parental leave, full-time sickness leave, unconventional career paths such as leave because of activities in industry or other non-academic sectors...) provide details about this below (reason, start/end date). This will allow the reviewers to fairly assess your career stage.

The range of input fields below offer you the opportunity to present a diverse range of career related activities, and of scientific output and achievements, in a context where FWO wishes to leave room for different profiles of academic researchers. That diversity will also be taken into account during the evaluation of your application. The input fields are structured according to the scoring grids, used by the expert panels.

SCIENTIFIC CONTRIBUTION

List your (up to five) main achievements, including your most important publications.

Here you can mention the publications and/or other achievements within the past 5 years you consider most relevant in order to prove your competences with regard to this fellowship application. The total number of all items (publications and other achievements) taken together amounts to five.

For publications: list all authors, title of publication and journal name (without abbreviations) with volume, start/end page and year. Mention whether the publication was peer reviewed or not. For book publications, give all necessary bibliographic information (author(s) or editor(s), book title, publisher, place, year, number of pages).

For other achievements: provide a short description, when it was undertaken and finalised and list all the relevant participants involved in it.

Mind, do mention for each achievement item (publications and other achievements) your share and its nature, and those of other significant partners in the workload.

Other scientific output and impact.

Here you are offered the opportunity to show any distinct research output that does not fit in the bibliographic publication list and that is meaningful in a broad sense for your profile with respect to this fellowship application. It may be constituted by a data base, surveys, a technical diagram, software, objects (masquettes, prototypes...), granted patents, keynote lectures or other lectures at scientific or other meetings, the organisation of such meetings, the organisation of or participation in exhibitions, activities as a scientific evaluator for submitted papers or grant applications and the like, and any other type of activity or output you consider to be relevant. Date the output where appropriate.

Describe any scientific or other (societal, economic, ...) impact beyond publications and obtained research funding.
List any scientific awards.
Mention the awarding body, title, date, amount and theme.

MOTIVATION AND COMPETENCES

Write a motivation statement.
Elaborate on your personal motivation, research interests and research vision, as well as on how your scientific background and competences fit with the proposed research project. Provide a clear and substantiated overview of expertise built up and skills already developed, as well as of competences yet to be (further) acquired, related to how you envision the development of your further career.

List your career building activities.
In this field you can mention a range of activities such as education activities, supervision of bachelor, master and PhD students, institutional responsibilities (governance, administration, ...), membership of scientific organisations and societies, (past as well as planned) active participation in networks, research collaborations (apart from research stays), R&D services provided to third parties, relevant training and the like.

Specify earlier mobility (research stays) in other organizations.
Specify any type of organization in Belgium or abroad, contact person, start/end date, function/activities.
Specify concrete mobility plans within the FWO fellowship: research stays in another organization (up to 12 months).

Specify any type of organization in Belgium or abroad, contact person, start/end date, function/activities. See Regulations of the Research Foundation – Flanders governing the Postdoctoral Fellowship art.1952.
Host institution – supervisor

This part of the application form provides info on host institutions and (co-)supervisors of your research. There are 3 levels where data can be filled in.

1. As a FWO postdoc researcher, you must be affiliated to a main Flemish host institution*. You must refer to a (main) supervisor in this institution.

* Eligible main host institutions are: Universities in the Flemish Community, the Evangelical Protestant Faculty of Leuven, the Faculty for Protestant Theology in Brussels, the Maritime Academy, the Vlerick Business School, the Antwerp Management School, and the Institute of Tropical Medicine.

Select a main Flemish host institution (Art. 3§1 of the FWO regulations) from the pick list, and name a main supervisor. The main supervisor will be invited by FWO to submit a recommendation letter. Co-supervisors will receive a notification by FWO.

(Optional) You can name a co-supervisor, affiliated to the same main host institution.

2. **Optional** In case of a collaboration with a Flemish or Federal scientific institution, where the research is carried out, (Regulations Art 3§1), the co-hosting organization and co-supervisor should be named. It should be mentioned on level 2.

Select an organization from the pick list*, and name a co-supervisor. If needed you can name another co-supervisor affiliated to this organization.

* If the organization is not mentioned on the pick list, select ‘other’ and name the organization FWO will consider whether this organization fulfills the requirements to act as a co-hosting institute.

3. **Optional** In case another co-supervisor oversees your project. Mention the organization he/she is affiliated to, and the corresponding co-supervisor. It should be mentioned on level 3.

Main Flemish host institution

Select an option

Supervisor

As a FWO postdoctoral fellow, you will report to a (main) supervisor in the main host institution. Apart from overseeing and mentoring your project, the role of the main supervisor in an FWO context is also to approve any adaptation of the project linked to the postdoctoral fellowship after its start, hear her he can be asked to hand in medical attestations in cases of medical leave of the fellow, will be informed about any work accident and will have to approve holiday periods of the fellow. The (main) supervisor will be invited by FWO to submit a recommendation statement on the postdoctoral fellowship application.

In case of collaboration with other research units in the same or other host organizations, co-supervisors should be mentioned. These will receive a notification by FWO. They will not be invited to submit recommendation letters.

Project

PROJECT DESCRIPTION

Project description

The project description should be structured following the template provided by FWO. The sequence of the different topics should be followed exactly as provided in the original template. The total project outline has a maximum of 10 A4 pages (Font Calibri 11, single line spacing, original template margins ...) herein included all tables, graphs, illustrations, etc.

Download template

Allowed file extension(s): pdf
Maximum file size is 10 MB.

Upload

Please upload your file(s)
APPLICATION POSTDOCTORAL FELLOWSHIP (junior/senior)
PROJECT OUTLINE (MAX. 10 pages)

The titles below provide a list of aspects that should be discussed in the project outline. This is followed by a brief description of the expected content in italics. Please retain these titles in the final project description, but remove the description. You may add extra titles and subtitles as necessary. Please stick to the maximum number of 10 A4 pages, without changing text layout (font Calibri 11, line distance 1, page margins etc.). Please also remove this explanatory paragraph before submitting this project description.

(if applicable) Changes to previous project proposal
If this postdoctoral project proposal has been submitted to FWO earlier, please concisely describe the major changes, e.g. how you considered the panel suggestions as a feedback to your first application.
Click here to insert your text.

Rationale and positioning with regard to the state-of-the-art
Elaborate the scientific motivation for the project proposal based on scientific knowledge gaps, and the issues and/or problems that you want to solve with this project. Concisely describe the related international state of the art, with reference to scientific literature. Position your project in relation to ongoing national and international research.
Click here to insert your text.

Scientific research objectives
Describe explicitly the scientific objective(s) and the research hypothesis. Explain whether and how the research is specifically challenging and inventive, describing in particular the innovative aspects of the envisaged results. Discuss in detail the results (or partial results) that you aim to achieve, such as specific knowledge and academic breakthroughs.
Click here to insert your text.

Research methodology and work plan
Elaborate the different envisaged steps (experiments/activities) in your research, and motivate your strategic choices with the aim of reaching the objectives. Describe the set-up and cohesion of the work packages including intermediate goals (milestones). Show where the proposed methodology (research approach) is according to the state of the art and where it is novel. Discuss risks that might endanger reaching project objectives and the contingency plans to be put in place should this risk occur.
Use a table or graphic representation of the planned course of activities (timing work packages, milestones, critical path) over the 3-years grant period.
Click here to insert your text.

References
Give an overview of the bibliographical references that are relevant for your research proposal.
Click here to insert your text.
OTHER FUNDING

Have the content of this proposal and at least the main part of the proposed research actions, be it with literally the same text or in a varied form, already been submitted before AND was it funded or is the funding decision still pending (applications that finally did not result in funding should not be mentioned)?

Yes  No

To whom have they been submitted?
☐ to FWO, regardless of the type of funding (fellowship, project, ...)

Specify the project number(s), title and programme.

Has the proposal already been funded?

Yes  Evaluation still pending

☐ to another organization

Please enter the name of that organization.

Has the proposal already been funded?

Yes  Evaluation still pending

Enter any additional remarks and the decision date(s) of pending evaluation(s) mentioned above.

- You are encouraged to use this field as an opportunity to point out potential overlap, complementarity, added value of current funding applied for or already obtained, ... related to the applications mentioned above.
- There can be good reason for applying or already having applied for funding at FWO or elsewhere. It is however important that the panel understands how pending applications for funding or obtained funding mentioned above relate to the current application.

State 'NA' if not applicable.
PROJECT POSITIONING AND EMBEDDING

Explain how this project fits into the research activities of the involved host institution(s).
Elaborate on the positioning and embedding of your project in the research group(s). If the project has already been initiated, please state the progress of your research.

Position the project in a national and international context.
Mention specific research collaborations planned in the course of this project, if appropriate, mention large projects, programmes or networks your proposal may be part of.

Did you take the issues of gender and diversity into account while designing your research plan (e.g. selection of human participants and/or animals in experiments, relevance of research questions and/or results with respect to gender differences, ...)?
This issue will be taken into account during evaluation as part of your research methodology and work plan.

Motivation

Did you or will you work with societal actors other than research partners in the whole or parts of the research process (from design of the application up to the execution of the research)?
This issue will be taken into account during evaluation as part of your research methodology and work plan.

Motivation
SCIENCE COMMUNICATION

Indicate how the results of the proposed research will be communicated to a non-expert audience.

FWO encourages its fellows to disseminate the results of their research widely and valorise them where possible.
**Bench fee**

**Requested bench fee (per project year).**

The bench fee allows you to cover costs for items directly related to your research activities as a FWO fellow, and according to article 6 of the regulation for bench fees. Per default, you are entitled a bench fee of € 4,000 per year. You can apply for a higher fee, up to € 10,000 per project year, with motivation.

*Minimum amount of entries: 3.*
*Maximum amount of entries: 3.*

Peer review

**INTERNAL PEER REVIEW**

There are 30 thematic panels, ranging over 5 scientific fields. More info on these panels and their specific scopes can be found here. You should select a scientific field first, and consecutively the panel that fits best with your research project. There is also an interdisciplinary panel, covering research in different scientific fields. A dedicated scheme on when you should apply to this panel can be found here.

Specify the scientific field in which your research is situated, then specify the dedicated panel.

intd - Interdisciplinary

Specify at least 2 sub scientific fields.

*Minimum amount of entries: 2.*
*Maximum amount of entries: 5.*

[Add]

Field ↑↓

Please add an item

Motivate your choice of expert panel.

In case you choose the interdisciplinary panel, please explain how in your opinion all scientific domains/disciplines involved in your application will gain, content-wise and/or methodologically, from the proposed research. More specifically, you should indicate which of the four options apply to your proposal (see scheme): The required expertise is not present within one discipline. The research question is about a joint problem for the disciplines involved. Tools / methods from one discipline to another still require an advanced level of development. The proposal does not fit within one of the disciplinary panels.
EXTERNAL PEER REVIEW

You may request to exclude up to three experts from the evaluation of your proposal as an external reviewer.

Suggestions for exclusion need to be motivated.
Please click 'Add' to provide the necessary data about each of these experts.

Please list a maximum of 3 experts not suitable as referee *(optional)*

*Maximum amount of entries: 3.*

Ethics

Ethical issues

In the table below, questions are listed on the ethical aspects of your research proposal. Select each ethical aspect that applies to your research proposal and specify with 'yes' or 'no'.

If you mark a 'yes' for the question, it follows that:

- **For the questions marked with *:** the applicant is legally or on the basis of institutional regulations obliged to ask for an ethical approval at the competent ethics committee of the host institution. Please do take into account that even when there is no obligation with regard to the research itself, for the publication of the results an approval may still be necessary.

  If you have answered questions with an * positively, you must submit your proposal to the ethics committee **as soon as your application has been approved for funding.** Your project can only start when this approval has been formally given. Only if the advice relates to a work package that is planned for a later stage of the project, and if legislation allows, the host institution can decide to give permission to the researcher to submit the proposal just before the start of that part of the research. Please keep in mind that this delayed permission is not possible for all research institutions. Also keep in mind that the advisory procedure can take some time and that therefore you should submit your proposal to the ethics committee **well in time.**

- **For the questions that are not marked:** perhaps no ethics approval may be needed for your research proposal. However, please do take into account that your host research institution might have a stricter policy towards ethics approval for certain research topics and methodology. Furthermore, even when there is no obligation with regard to the research itself, for the publication of the results an ethics approval may still be necessary. At any case, the applicant will have to reflect on those issues and take, if necessary, appropriate measures. If in doubt, it is advised to contact the supporting services of your host institution.

For more information, check the FWO webpage on research ethics and the Guidelines on FWO's ethics checklist.

- I confirm that I have read all questions below and that there are no ethical issues concerning my research proposal.
Ethics advice related to these questions should always be requested before the start of the research project as a whole (as soon as your application has been approved for funding). In addition to ethics approval by your local ethics committee, research projects using human embryos also require subsequent approval by the Federal Commission for Medical and Scientific Research on embryos in vitro (FCE).

**Does your research involve human Embryonic Stem Cells (hESCs)?** *

- Yes
- No

**Will the hESCs be directly derived from embryos within this project?**

- Yes
- No

**Are the hESCs previously established cell lines?**

- Yes
- No

**Does your research involve the use of human embryos?** *

- Yes
- No

**Does your research involve the use of human foetal tissues / cells?** *

- Yes
- No
Does your research involve human participants?

Yes  No

Are they volunteers for social or human sciences research?

Please note that not every research involving human participants triggers the obligation to request ethical approval. However, it is important to keep in mind that the journal in which you want to publish the results of your research might ask you, nonetheless, to submit an ethical approval. For this reason, it might be advisable to request ethical approval anyway before the start of the project from the relevant ethics committee within your institution.

Yes  No

Are they persons unable to give informed consent (including children/minors)? *

Yes  No

Are they vulnerable individuals or groups? *

Yes  No

Are they children/minors? *

Yes  No
Are they patients? *

Yes  No

Are they healthy volunteers for medical studies? *

Yes  No

Does your research involve physical interventions on the study participants? *

Yes  No

Does it involve invasive techniques?

Yes  No

Does it involve collection of biological samples?

Yes  No
Does your research involve human cells or tissues (other than from human embryos/foetuses, i.e. section 1)? *

Yes  No

Are they obtained from commercial sources?

Yes  No

Do they originate from another laboratory/institution/biobank?

Yes  No

Were they produced or collected by you during previous research activities?

Yes  No

Are they produced or collected by you as part of this project?

Yes  No
Personal data are defined as ‘any information relating to an identified or identifiable natural person’. An ‘identifiable natural person’, or ‘data subject’, is ‘one who can be identified, directly or indirectly, in particular by reference to an identifier such as a name, an identification number, location data, an online identifier or to one or more factors specific to the physical, physiological, genetic, mental, economic, cultural or social identity of that natural person’ (Article 4(1) GDPR).

**Does your research involve collecting and/or processing of personal data?**

The GDPR requires that all personal data processing activities are recorded. Please consult your host institution for the procedure to follow as soon as the project is granted.

Yes  No
Animals

Does your research involve research procedures to live non-human vertebrate animals (incl. independently feeding larval forms, foetal forms of mammals in the last trimester of their normal development) and/or cephalopods, and/or forms in earlier stages (if the experiments have consequences in later stages)? *

- Yes
- No

Are they non-human primates?

In this case it is necessary to have obtained ethical approval at the time of submitting your proposal for funding.

- Yes
- No

Upload the ethical approval on the intended experiments on non-human primates.

*Allowed file extension(s): .pdf
Maximum file size is 10 MB.

- Upload

Please upload your file(s)

Are they genetically modified animals?

- Yes
- No

Are they cloned farm animals?

- Yes
- No

Are they endangered species?

- Yes
- No
Does your research involve genetic resources or traditional knowledge associated with genetic resources, that are captured by the EU Regulation related to the Nagoya Protocol?

In Access and Benefit Sharing legislation, more specifically according to the EU-legislation related to the Nagoya Protocol, 'genetic resources' are defined as 'any material of plant, animal, microbial or other origin containing functional units of heredity and that is of actual or potential value', and 'traditional knowledge associated with genetic resources' means 'knowledge held by an indigenous or local community that is relevant for the utilisation of genetic resources'. Please consult https://nagoya.vlir.be for the procedure to follow as soon as the project is granted.

Yes  No

Provide the name of the country/countries.
For all these issues it is necessary to comply with relevant legislation and regulations. Please contact the supporting services at the host institution, as soon as the project is granted.

Do you plan to use local resources (e.g. animal and/or human tissue samples, genetic material, live animals, human remains, materials of historical value, endangered fauna or flora samples, etc.)?

Yes  No

Do you plan to import/export any material from/to other countries?

Yes  No

Could the situation in the country put the researcher and/or the individuals taking part in the research at risk?

Yes  No
Please consult the brochure of the Flemish Interuniversity Council on the topic. For these issues your host institution has to be consulted when the project is granted.

Does your research have the potential for military applications? *

Yes  No

Does this research involve dual-use items in the sense of Regulation 428/2009, or other items for which an authorisation is required?

'Dual-use goods' are 'goods, software and technology that are commonly used for civilian purposes, but that can have military applications, or can contribute to the production or distribution of weapons of mass destruction'.

Yes  No
Some research can generate knowledge, materials, methods or technologies that could also be used in unethical ways. Although such research is carried out with benign intentions, people with bad intentions may potentially harm humans, animals or the environment with the acquired research results.

Does your research have the potential for misuse of research results?

Yes  No

Do the activities and chosen partners pose a potential risk for a Human Rights infraction?

Yes  No
Does your research involve the use of elements that may cause harm to the environment (water, air, soil, noise, ...), to animals or plants?

- Yes
- No

Does your research involve the use of elements that may cause harm to humans, including research staff and their co-workers?

- Yes
- No

Is (part of) your research carried out within protected areas?

- Yes
- No

Do the proposed experiments make use of any parts of animals, GMO’s or pathogens?

- Yes
- No

Do the proposed experiments make use of activities, installations or products that need to be covered by permits (ionizing radiation, radioactive substances, pharmaceutical products, drug precursors, explosives and precursors, cyanides, ...)?

- Yes
- No
Other ethics issues

**Are there any other issues that should be taken into consideration? (optional)**

Your research may raise new ethical issues and concerns that are currently not (fully) covered by the Ethics Issue Table (e.g., new developments in the fields of neurobiology, man-machine interaction, developments in nanotechnology, genetic enhancement, the creation of androids and cyborgs, Artificial Intelligence, etc.).

**Work packages (optional)**

Give the number and description of the work packages for which you will submit an application to the relevant ethics committee(s).

<table>

I hereby confirm having taken note that an ethical approval is needed for issues indicated with an asterisk (*) and/or that I will adhere to all relevant legislation and institutional policies pertaining to issues with or without asterisk (*) that apply to my proposal. If an ethical approval is required, I will ensure to obtain this approval from the competent ethics committee of my host institution, at the latest before starting with the ethical sensitive activities.
Data management plan

Data management is an integral part of sound scientific research. It covers the description of data and metadata, their storage and long-term preservation, the designation of responsible persons, the handling of highly sensitive data, and the open access to and sharing of research data. The FWO has made data management a key element of its policy for all support channels provided by the FWO. The FWO expects researchers to pay due attention to this dimension before, during and for at least five years after their research.

For background information on data management and the procedures regarding the Data Management Plan (DMP), which FWO expects from its applicants when applying for research funding, please see our website.

Describe the datatypes (surveys, sequences, manuscripts, objects ...) the research will collect and/or generate and/or (re)use.

Specify in which way the following provisions are in place in order to preserve the data during and at least 5 years after the end of the research.

Motivate your answer.

- Designation of responsible person (If already designated, please fill in his/her name.)
- Storage capacity/repository
  - during the research
  - after the research

What is the reason why you wish to deviate from the principle of preservation of data and of the minimum preservation term of 5 years?
Are there issues concerning research data indicated in the ethics questionnaire of this application form? If yes, which specific security measures those data require? (optional)

Which other issues related to the data management are relevant to mention?
DECLARATION BY THE APPLICANT

General

In completing this application, the applicant confirms that to the best of his/her knowledge and belief, the information in this application is complete and correct.

The applicant will inform FWO immediately if the intended project cannot be carried out as foreseen or if a major change occurs that may hinder the planned implementation of the project.

The applicant declares that he/she has read and agrees with the FWO regulations that form an integral part of the application documents published on the FWO website and that form the legal basis of the future contract. Furthermore, they take note that the FWO is committed to the principles of the European Charter for Researchers and the Code of Conduct for their Recruitment.

The applicant agrees that the data required for the application and follow-up are electronically stored and used by the FWO. The FWO will use the data provided by the applicant according to the legal requirements of data protection in Belgium, including the use of the anonymized data for statistical purposes and reports. As soon as the FWO has processed your application, you will receive a notification message. The FWO respects the Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation) in regards to the processing of your personal data. For more information concerning the privacy policy of the FWO, we redirect you to our website: http://www.fwo.be/en/the-fwo/organisation/processing-personal-data-privacy/.

The applicant agrees that the FWO will forward the full application form including their personal data to the members of the FWO expert panels and to experts involved in the evaluation of their proposal in Flanders and abroad (EU and outside EU) and to a partner organization, if there is any. The panel members and experts must declare in advance that they will treat data confidentially and that they will not forward the data or the knowledge gained to anyone nor use it for their own purpose. FWO will take the necessary safety measures to assure this data transfer to the aforementioned organizations or persons will take place in a secure and correct way. More information and details, if available, are published on the FWO website.

Furthermore, the applicant agrees that the following information may be included in lists published by the FWO: title/abstract, full name of the beneficiaries/supervisors, host institution(s), scientific domains/disciplines/key words; start date and end date, allocated funding of the project.

The applicant declares that all information provided in the personal data section of the FWO E-portal is accurate and up-to-date.

Research Integrity

The FWO watches over the scientific integrity from the moment research funding is applied for until the execution of the research and the publication of the research results. Therefore, researchers benefiting from FWO support as well as their host institutions, (co-)supervisors and other collaborators involved in FWO research are required to adhere to the scientific integrity at all times.

To this end, elementary rules of behaviour have been laid down in the Ethical Code for scientific research in Belgium and the European Code of Conduct for Research Integrity. Both documents are included in the call for research proposals. The FWO assumes that each researcher has acknowledged these codes from the moment the application is submitted and undertakes to comply with their provisions in all stages of the proposed research. This also applies to their host institutions, (co-)supervisors and collaborators involved in FWO research, for whom the applicant bears partial responsibility.

If there is any doubt about the applicability or implementation of a provision, the host institution and/or the researcher responsible for the project at hand will contact the FWO administration in order to clarify or make concrete arrangements about the relevant provision.
