EXAMPLE OF AN APPLICATION FORM:

JUNIOR/SENIOR RESEARCH PROJECT FUNDAMENTAL RESEARCH
Login to E-loket

Applicants first have to register in order to receive a login name and password, which gives access to the web-based FWO e-portal for preparing and submitting a proposal. Go to the FWO home page (http://www.fwo.be/en/) and click on E-loket.
Please make sure to update your personal data with each future application, especially the publications section.
Amendments to the application form for the purpose of broadening the research(er) profile and responsible research and innovation

The application form for this support programme has been amended to give more attention to various researcher profiles and research results.

In the new form, the subsections relating to peer reviewed articles are merged into a single section (i.e. without distinguishing between Web of Science, VABB-SHW and the like), the section ‘other output and impact’ in the CV template is placed in a broader context, a ‘research statement’ is introduced in which ‘short CV’ and ‘career path’ coincide, enabling the researcher to insert a narrative, and there is the option to present and clarify the five most relevant publications and/or achievements over the last five years, and to include the research funding obtained over the last five years.

The evaluation procedure has also been amended accordingly: in the score grids, the score descriptors have been supplemented with the new elements in the application form.

The purpose of these amendments is to give researchers the opportunity to demonstrate a range of scientifically relevant activities, skills, experiences and achievements. The FWO is thus following an international trend away from a one-sided focus on ‘classical’ output criteria (such as publications, bibliometrics, patents and the like) towards a broader view of what science can be and accomplish, with respect for the specificity of each discipline. The new application forms are aimed to help the researcher demonstrate that versatility.

The application form now also features two questions relating to ‘responsible research and innovation’: one about the extent to which ‘gender and diversity’ has been taken into account in the research approach and another about the involvement of social stakeholders in the research. Applicants can justify their answers to both questions or, where appropriate, indicate why these aspects are not relevant to their application. The questions are intended to raise awareness about these aspects in terms of what is understood as responsible research and innovation.

Please note, when entering publications, the previous sections A.1.1. and A.1.2. in the publication lists have been merged into a single section: ‘peer reviewed articles in journals’. A2 deals with ‘non-peer reviewed articles in journals’. With the transition from the old to the new system, publications previously entered in A.1.1. and A.1.2. have already been combined in chronological order in the new section A1. However, applicants remain themselves responsible for the accuracy of the information included in the personal details, application forms and the like. Applicants are therefore advised to carefully check their combined publications in A1.
After completing or editing your personal profile, you may start or proceed preparing your application. On your dashboard select ‘New application’ to start a new application or select ‘my applications’ to complete an unfinished application. To continue preparing an existing application that has not been submitted yet, go to ‘overview of your applications’ on the next webpage.

Select an application category and type:

**Select Application Type**

- Select an option
- Create application
There are two types of research projects: junior and senior.

**Junior projects fundamental research:** supervisor - spokesperson and all (co-)supervisors must have obtained their first PhD degree maximum 12 years before the submission deadline of the project application.

**Senior projects fundamental research:** supervisor - spokesperson or one of the (co-)supervisors has obtained his/her first PhD degree more than 12 years before the submission deadline of the project application.

Exceptions: consult art. 10 §5 of the regulations.

**Working title** *(optional)*

Define a working title for your application so you can easily identify it later. This title is not a part of the application itself. This application is not yet using our new system, which means this title can't be changed in the future.

*Use up to 1500 characters.*

**Complete the abstract in layman's terms of your research proposal - Dutch version.**

*Use up to 1500 characters.*
Host institution - supervisor

For a project fundamental research (junior or senior) there are 3 types of applicants:

1. **Supervisor-spokesperson**: the main applicant of the project, affiliated to a Flemish main host institution* (mandatory for each project). For eligibility requirements see regulations, art. 10.

2. **Supervisor**: the main applicant of (a) partner Flemish main host institution(s).* For eligibility requirements see regulations, art. 10.

3. **Co-supervisor**: the co-applicant within (1) the Flemish main host institution of the supervisor-spokesperson and/or (2) (a) partner Flemish main host institution(s).* For eligibility requirements see regulations, art. 10 or 11 (postdoc-level).

OR

- The main applicant and potential co-applicant(s) within an eligible non-main host institution. For eligibility requirements see regulations, art. 11.

* Universities in the Flemish Community, the Evangelical Protestant Faculty in Leuven, the Faculty for Protestant Theology in Brussels, the Maritime Academy, the Vilnius Business School, the Antwerp Management School, and the Institute of Tropical Medicine.

Based on the available information, the supervisor(spokesperson) is required to justify that he/she will normally be leading the project throughout its life cycle, regardless of the nature of the application. If the supervisor(spokesperson) submits a duly substantiated justification, he/she will be deemed to meet the requirement of this article.

This provision also applies to co-supervisors acting as main applicant and therefore managing the budget line of an eligible research institution other than one of the main host institutions as referred to in article 7, paragraph 2 of the regulations for projects fundamental research.

Please note that all applicants (supervisor-spokesperson and (co-)supervisor(s)) must have a fully up to date online E-toket FWO profile including a full list of publications and list of disciplines adjusted to the new discipline codes (as from 01/10/2018).

1. Specify the main Flemish host institution.
2. Specify additional Flemish or federal host institution(s). (optional)
3. Specify additional non-Flemish research institution(s). (optional)

Requested funding

Add per host institution the requested funding for staff, consumables and equipment.

For each host institution, an amount of €45,000 to €130,000 per project year for staff and consumables can be applied for. For interinstitutional projects these limits apply per host institution. However, for partner institutions (not the main host institution) the lower limit can be reduced to 60 or €20,000. Per project a maximum amount of €100,000 for equipment can be applied for. This can take the form of matching funding.

Each non-Flemish research institution may receive funding insofar as the funding for all non-Flemish research institutions combined does not exceed 10% of the total requested project budget.

The real staff cost is used when the name of the researcher to be employed on the project is already known. When the name is not yet known, the following amounts must be used as indicative costs:

- Pre-doctoral researcher with stipend (bursary): €45,000 – €55,000;
- Pre-doctoral researcher with salary, 3 years of seniority: €55,000 – €75,000;
- Post-doctoral researcher, 4 years of seniority: €50,000 – €65,000;
- Technical staff, 5 years of seniority: €60,000 – €65,000.

Supervisors-spokespersons, supervisors and co-supervisors are not allowed any remuneration or accumulation with a remuneration under a research project funded by FWO.

Please note that all materials acquired under an equipment grant of the FWO will become the property of the main host institution to which the grant holder is affiliated, or of the host institution, by virtue of the agreement made with the main host institution. The existence/content of such an agreement will be checked during project audits.

PROJECT DESCRIPTION

IMPORTANT!

The project description should be structured following the template provided by FWO. The sequence of the different topics should be followed exactly as provided in the original template. The total project outline has a maximum of 10 A4 pages (Font Calibri 11, single line spacing, original template margins ...) herein included all tables, graphs, illustrations, etc.

Download template.

You can upload the project description as a PDF-file here (max. 10 MB).

Upload
APPLICATION RESEARCH PROJECT (junior/senior)

PROJECT OUTLINE (MAX. 10 A4 pages)

The titles below provide a list of aspects that should be discussed in the project outline. This is followed by a brief description of the expected content in italics. Please retain these titles in the final project description, but remove the description. You can add extra titles and subtitles as necessary. Please stick to the maximum number of 10 pages, without changing text layout (font Calibri 11, line distance 1, page margins etc.). Please also remove this explanatory paragraph as well before submitting the template.

In case this application involves a resubmission of an FWO application that was not granted, please indicate in the various sections of the project template the changes made compared to this earlier submission.

In case this application is a continuation of an FWO and/or any other application that was granted before, please clearly indicate in the various sections of the project template how this projects built upon earlier granted proposal, thereby motivating a continuation.

Rationale and positioning with regard to the state-of-the-art

Elaborate the scientific motivation for the project proposal based on scientific knowledge gaps, and the issues and/or problems that you want to solve with this project. Concisely describe the related international state of the art, with reference to scientific literature. Position your project in relation to ongoing national and international research.

Click here to insert your text.

Scientific research objectives.

Describe explicitly the scientific objective(s) and the research hypothesis. Explain whether and how the research is specifically challenging and inventive, also with reference to the innovative aspects of the envisaged results. Discuss in detail the results (or partial results) that you aim to achieve, such as specific knowledge and academic breakthroughs.

Click here to insert your text.

Research methodology and work plan.

Elaborate the different envisaged steps (experiments/activities) in your research, and motivate your strategic choices with the aim of reaching the objectives. Describe the set-up and cohesion of the work packages including intermediate goals (milestones).
Discuss where the proposed methodology (research approach) is according to the state of the art and where it is novel.
Discuss risks that might endanger reaching project objectives and the contingency plans to be put in place should this risk occur.
Use a table or graphic representation of the planned course of activities (timing work packages, milestones, critical path) over the 4-years grant period.
Describe the collaboration/coordination/work distribution between the different participating research groups as well as the role/complementarity of the different research groups/(co-)supervisors.

Click here to insert your text.

References

Give an overview of the bibliographical references that are relevant for your research proposal.

OTHER FUNDING

Have the content of this proposal and at least the main part of the proposed research actions, be it with literally the same text or in a varied form, already been submitted before AND was it funded or is the funding decision still pending (applications that finally did not result in funding should not be mentioned)?

☐ yes      ☐ no

To whom have they been submitted?

☐ to PWD, regardless of the type of funding (fellowship, project...)

Specify the project number(s), title and programme.
Use up to 2000 characters.

Has the proposal already been funded?

☐yes  ☐ funding decision still pending

☐ to another organization

Please enter the name of that organization.
Use up to 240 characters.

Has the proposal already been funded?

☐yes  ☐ funding decision still pending

Enter any additional remarks and the decision date(s) of pending funding decision(s) mentioned above

- You are encouraged to use this field as an opportunity to point out potential overlap, complementarity, added value of current funding applied for or already obtained ... related to the applications mentioned above.
- There can be a good reason for applying or already having applied for funding at PWD or elsewhere. It is however important that the panel understands how pending applications for funding or obtained funding mentioned above relate to the current application.

State NA if not applicable.
Use up to 1000 characters.

PROJECT POSITIONING AND EMBEDDING

Elaborate on the positioning and embedding of your project in the research group(s).
If the project has already been initiated, please state the progress of your research.
Use up to 1200 characters.

Position the project in a national and international context.
Mention research collaborations, larger projects, programs and international networks in which your research can be situated.
Use up to 1200 characters.

Did you take the issues of gender and diversity into account while designing your research plan (e.g. selection of human participants and/or animals in experiments, relevance of research questions and/or results with respect to gender differences, ...)?
This issue will be taken into account during evaluation as part of your research methodology and work plan.

☐ Yes ☐ Not applicable

Motivation
Use up to 1200 characters.

Please specify.
Did you or will you work with societal actors other than research partners in the whole or parts of the research process (from design of the application up to the execution of the research)?

This issue will be taken into account during evaluation as part of your research methodology and work plan.

- [ ] yes
- [ ] not applicable

**Motivation**
Use up to 1200 characters:

---

**SCIENCE COMMUNICATION**

Indicate how the results of the proposed research will be communicated to a non-expert audience.

FWO encourages its fellows to disseminate the results of their research widely and valorise them where possible.
Use up to 1200 characters:
Peer review
Internal peer review

INTERNAL PEER REVIEW

Specify the scientific field in which your research is situated, then specify the dedicated panel.

bio - Biological Sciences

Specify the expert panel.

Motivate your choice of expert panel.

Select up to five scientific disciplines that best characterize the proposed research.

Add

Enter up to three free-text keywords or concepts that best characterize the proposed research.

These keywords allow reviewers to quickly understand the broad scope of your proposal.

Use up to 240 characters.
EXTERNAL PEER REVIEW

You may request to exclude up to three experts from the evaluation of your proposal as an external reviewer. (Optional)
Suggestions for exclusion need to be motivated.
Please click 'Add' to provide the necessary data about each of these experts.

Please list a maximum of 3 experts not suitable as referee

first name

surname

e-mail (optional)

institution

☐ The expert has a conflict of interest making him/her unfit to make an objective assessment.

☐ The expert might use the content of the application for other purposes than its assessment.

short additional motivation to exclude this expert(s)
Use up to 500 characters.
In the table below, questions are listed on the ethical aspects of your research proposal.

If you mark a ‘yes’ for the question, it follows that:

- **For the questions marked with “*”:** the applicant is legally or on the basis of institutional regulations obliged to ask for an ethical approval at the competent ethics committee of the host institution. Please do take into account that even when there is no obligation with regard to the research itself, for the publication of the results an approval may still be necessary.

  If you have answered questions with an “*” positively, you must submit your proposal to the ethics committee **as soon as your application has been approved for funding**. Your project can only start when this approval has been formally given. Only if the advice relates to a work package that is planned for a later stage of the project, and if legislation allows, the host institution can decide to give permission to the researcher to submit the proposal just before the start of that part of the research. Please keep in mind that this delayed permission is not possible for all research institutions. Also keep in mind that the advisory procedure can take some time and that therefore you should submit your proposal to the ethics committee **as early as possible**.

- **For the questions that are not marked:** Perhaps no ethics approval may be needed for your research proposal. However, please do take into account that your host research institution might have a stricter policy towards ethics approval for certain research topics and methodology. Furthermore, even when there is no obligation with regard to the research itself, for the publication of the results an ethics approval may still be necessary. At any case, the applicant will have to reflect on those issues and take, if necessary, appropriate measures. If in doubt, it is advised to contact the supporting services of your host institution.

For more information, check the FWO webpage on research ethics and the Guidelines on FWO’s ethics checklist.
1. Human embryos/foetuses
2. Humans
3. Human cells/tissues
4. Personal data
5. Animals
6. Access and benefit sharing and the Nagoya Protocol
7. (Inter)national collaboration
8. Dual use and military applications
9. Misuse & human rights
10. Other ethics issues (optional)
11. Environment & health and safety

Work packages (optional)

- I confirm that none of the issues above apply to my proposal.
- I hereby confirm having taken note that an ethical approval is needed for issues indicated with an asterisk (*) and/or that I will adhere to all relevant legislation and institutional policies pertaining to issues with or without asterisk (*) that apply to my proposal. If an ethical approval is required, I will ensure to obtain this approval from the competent ethics committee of my host institution, at the latest before starting with the ethical sensitive activities.
### 1. Human embryos/foetuses

**Does your research involve human Embryonic Stem Cells (hESCs)?**

- [ ]

  - Will the hESCs be directly derived from embryos within this project?
    - [ ]

  - Are the hESCs previously established cell lines?
    - [ ]

**Does your research involve the use of human embryos?**

- [ ]

**Does your research involve the use of human foetal tissues / cells?**

- [ ]
2. Humans

Does your research involve human participants?

• Are they volunteers for social or human sciences research?

   Please note that not every research involving human participants triggers the obligation to request ethical approval. However, it is important to keep in mind that the journal in which you want to publish the results of your research might ask you, nonetheless, to submit an ethical approval. For this reason, it might be advisable to request ethical approval anyway before the start of the project from the relevant ethics committee within your institution.

• Are they persons unable to give informed consent (including children/minors)? *

• Are they vulnerable individuals or groups? *

• Are they children/minors? *

• Are they patients? *

• Are they healthy volunteers for medical studies? *

Does your research involve physical interventions on the study participants? *

• Does it involve invasive techniques?

• Does it involve collection of biological samples?
### 3. Human cells/tissues

Does your research involve human cells or tissues (other than from human embryos foetuses, i.e. section 1)?

- **Are they obtained from commercial sources?**

- **Do they originate from another laboratory/institution/biobank?**

- **Were they produced or collected by you during previous research activities?**

- **Are they produced or collected by you as part of this project?**

### 4. Personal data

Does your research involve collecting and/or processing of personal data?

The GDPR requires that all personal data processing activities are recorded. Please consult your host institution for the procedure to follow as soon as the project is granted.
5. Animals

Does your research involve research procedures to live non-human vertebrate animals (incl. independently feeding larval forms, foetal forms of mammals in the last trimester of their normal development and/or cephalopods, and/or forms in earlier stages (if the experiments have consequences in later stages)?

- Are they non-human primates?
  
  In this case it is necessary to have obtained ethical approval at the time of submitting your proposal for funding.

- Are they genetically modified animals?

- Are they cloned farm animals?

- Are they endangered species?

6. Access and benefit sharing and the Nagoya Protocol

Does your research involve genetic resources or traditional knowledge associated with genetic resources, that are captured by the EU Regulation related to the Nagoya Protocol?

In Access and Benefit Sharing legislation, more specifically according to the EU-legislation related to the Nagoya Protocol, 'genetic resources' are defined as 'any material of plant, animal, microbial or other origin containing functional units of heredity and that is of actual or potential value,' and 'traditional knowledge associated with genetic resources' means 'knowledge held by an indigenous or local community that is relevant for the utilisation of genetic resources'. Please consult http://nagoya.vfri.be for the procedure to follow as soon as the project is granted.

- Provide the name of the country/countries.
  
  Use up to 4000 characters.
### 7. International collaboration

Do you plan to use local resources (e.g. animal and/or human tissue samples, genetic material, live animals, human remains, materials of historical value, endangered fauna or flora samples, etc.)?

Do you plan to import/export any material from/to other countries?

Provide the name of the country/countries. Use up to 4000 characters.

Could the situation in the country put the researcher and/or the individuals taking part in the research at risk?

### 8. Dual use and military applications

Does your research have the potential for military applications?

Does this research involve dual-use items in the sense of Regulation 428/2009, or other items for which an authorisation is required?

*Dual-use goods* are ‘goods, software and technology that are commonly used for civilian purposes, but that can have military applications, or can contribute to the production or distribution of weapons of mass destruction’.

### 9. Misuse & human rights

Does your research have the potential for misuse of research results?

Do the activities and chosen partners pose a potential risk for a Human Rights infraction?
10. Other ethics issues (optional)

Are there any other issues that should be taken into consideration? (optional)
Your research may raise new ethical issues and concerns that are currently not fully covered by the Ethics Issue Table (e.g. new developments in the fields of neurobiology, man-machine interaction, developments in nanotechnology, genetic enhancement, the creation of androids and cyborgs, Artificial Intelligence, etc.).
Use up to 2500 characters.

11. Environment & health and safety

Does your research involve the use of elements that may cause harm to the environment (water, air, soil, noise, ...), to animals or plants?

Does your research involve the use of elements that may cause harm to humans, including research staff and their co-workers?

Is (part of) your research carried out within protected areas?

Do the proposed experiments make use of any parts of animals, GMO’s or pathogens?

Do the proposed experiments make use of activities, installations or products that need to be covered by permits (ionizing radiation, radioactive substances, pharmaceutical products, drug precursors, explosives and precursors, cyanides, ...)?
Work Packages

Give the number and description of the work packages for which you will submit an application to the relevant ethics committee(s):

Number/description of WP(s):

Starting date of WP(s):

Please specify which ethics committee(s) deal(s) will deal with your application:

Data management plan

Data management is an integral part of sound scientific research. It covers the description of data and metadata, their storage and long-term preservation, the designation of responsible persons, the handling of highly sensitive data, and the open access to and sharing of research data.

The FWO has made data management a key element of its policy for all support channels provided by the FWO. The FWO expects researchers to pay due attention to this dimension before, during and for at least five years after their research.

For background information on data management and the procedures regarding the Data Management Plan (DMP), which FWO expects from its applicants when applying for research funding, please see our website.

Describe the datatypes (surveys, sequences, manuscripts, objects …) the research will collect and/or generate and/or (re)use.

Use up to 700 characters.

<table>
<thead>
<tr>
<th>Specify in which way the following provisions are in place in order to preserve the data during and at least 5 years after the end of the research?</th>
</tr>
</thead>
</table>

Motivate your answer:

a. Designation of responsible person (If already designated, please fill in his/her name.)

b. Storage capacity/repository

• during the research
• after the research

Use up to 700 characters.
What is the reason why you wish to deviate from the principle of preservation of data and of the minimum preservation term of 5 years?

Use up to 700 characters.

Are there issues concerning research data indicated in the ethics questionnaire of this application form? If yes, which specific security measures those data require? (optional)

Use up to 700 characters.

Which other issues related to the data management are relevant to mention?

Use up to 700 characters.

DECLARATION BY THE APPLICANT

General

In completing this application, the applicant confirms that to the best of their knowledge and belief, the information in this application is complete and correct.

The applicant will inform FWO immediately if the intended project cannot be carried out as foreseen or if a major change occurs that may hinder the planned implementation of the project.

The applicant declares that they have read and agree with the FWO regulations that form an integral part of the application documents published on the FWO website and that form the legal basis of the future contract. Furthermore, they take note that the FWO is committed to the principles of the European Charter for Researchers and the Code of Conduct for their Recruitment.

The applicant agrees that the data required for the application and follow-up are electronically stored and used by the FWO. The FWO will use the data provided by the applicant according to the legal requirements of data protection in Belgium, including the use of the anonymized data for statistical purposes and reports. As soon as the FWO has processed your application, you will receive a notification message. The FWO respects the Regulation (EU) 2016/679 of the European Parliament and of the Council of 27 April 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data, and repealing Directive 95/46/EC (General Data Protection Regulation) in regards to the processing of your personal data. For more information concerning the privacy policy of the FWO, we redirect you to our website: http://www.fwo.be/en/the-fwo/organisation/processing-personal-data-privacy/.

The applicant agrees that the FWO will forward the full application form including their personal data to the members of the FWO expert panels and to experts involved in the evaluation of their proposal in Flanders and abroad (EU and outside EU) and to a partner organization, if there is any. The panel members and experts must declare in advance that they will treat data confidentially and that they will not forward the data or the knowledge gained to anyone not use it for their own purpose. FWO will take the necessary safety measures to assure this data transfer to the aforementioned organizations or persons will take place in a secure and correct way. More information and details, if available, are published on the FWO website.

Furthermore, the applicant agrees that the following information may be included in lists published by the FWO: title/abstract; full name of the beneficiaries/supervisors; host institution(s); scientific domains/disciplines/key words; start date and end date, allocated funding of the project.

The applicant declares that all information provided in the personal data section of the FWO E-portal is accurate and up-to-date.

Research Integrity

The FWO watches over the scientific integrity from the moment research funding is applied for until the execution of the research and the publication of the research results. Therefore, researchers benefiting from FWO support as well as their host institutions, (co-)supervisors and other collaborators involved in FWO research are required to adhere to the scientific integrity at all times.

To this end, elementary rules of behaviour have been laid down in the Ethical Code for scientific research in Belgium and the European Code of Conduct for Research Integrity. Both documents are included in the call for research proposals. The FWO assumes that each researcher has acknowledged these codes from the moment the application is submitted and undertakes to comply with their provisions in all stages of the proposed research. This also applies to their host institutions, (co-)supervisors and collaborators involved in FWO research, for whom the applicant bears partial responsibility.

If there is any doubt about the applicability or implementation of a provision, the host institution and/or the researcher responsible for the project at hand will contact the FWO administration in order to clarify or make concrete arrangements about the relevant provision.

I agree  I do not agree
